

## FRONT BRAKE SYSTEM

### CALIPERS

ESTELLE 1977 - 1983 AND 1984 ON 105/120 SALOONS

2 piston design Piston diameter 46mm

ESTELLE 130 AND ALL RAPID MODELS

4 piston design Piston diameter 34mm length 29.6mm.

The pistons are marked on the top face with a continuous groove to identify them from 28.6mm pistons fitted by another manufacturer.

### FRICTION MATERIAL (FRONT)

ESTELLE 1977 - 1983 AND 1984 ON 105/120 SALOONS

OS12 OR OS13 THICKNESS NEW 15MM MINIMUM 7MM

ESTELLE 130 AND ALL RAPID MODELS

TO 1/86 COSID 620 THICKNESS NEW 15MM MINIMUM 7MM

FROM 1/86 OS3302

COSID 620 HAS A SHORTER LIFE THAN 105/120 RANGE OS12

### DISCS

Estelle 1977-1983 and 1984 on 105/120 saloons.

Diameter 252mm Thickness 9mm minimum 7mm reground 8mm

Estelle 130 and all Rapid Models.

Diameter 247mm Thickness 9mm to 3/84 minimum 8mm reground 8.5mm

Thickness 9.50mm from 3/84 these later discs have an identification groove around the periphery (top edge).

The disc thickness was changed to allow for higher one sided pressure on four piston calipers due to seized pistons or blockage of the transfer hole.

The disc diameter was reduced by 5mm to 247 to allow the four piston caliper to fit inside the current 13" wheels.

Maximum runout at 240mm diameter = 0.15 mm All Models.
